

ARTEMIS

THERMAL FRONT ATTACHMENT

Attention!

Export of **Artemis 25/35** models
May have export limitations depending on
the laws in your region.

Attention!

The proper usage of the device is important for safe exploitation!
Therefore read carefully the present manual!

If the device was left in storage for a longer period of time, before exploitation check its functionality.

Disassembling of the device is prohibited, except in authorized repair centers.

The external optical surfaces should be clean at all times. Touching the optical surfaces with bare hands is not recommended.

Sand and sea water can damage the optical coatings!

Do not point the device directly at the sun!

Image performance is dependent on scenery and atmosphere conditions. Contrast in the same image may vary as a function of the time of day due to the effect of the sun. For example, at sunset objects will have absorbed different levels of heat resulting in greater temperature differences and better contrast.

When left in storage for a longer period of time, batteries have to be removed and stored in polyethylene bags to prevent contact with metal. (It is recommended to recharge the batteries every two to three months)

When carrying or transporting the device, put the protective lens cap!

Condensation can cause fogging of the optical surfaces! Condensation occurs when the temperature or humidity changes as follows:

- When moving the device from cold to warm place or vice versa;
- In places with high humidity.

When equalizing the temperature of the device with the environmental, the condensation disappears. Use the towel to remove moisture.

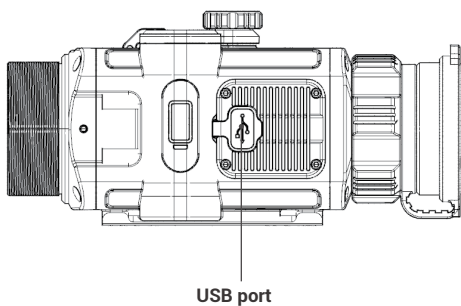

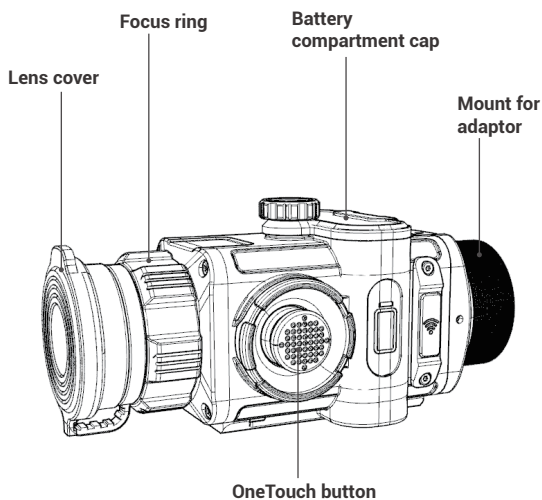

Clean the lens surfaces with the Lens Cloth or with the napkin!

LEGAL NOTICE

Before attaching to weapons, check the regional legal regulations in the area of application.

The attachment to a weapon is always the sole responsibility of the user.

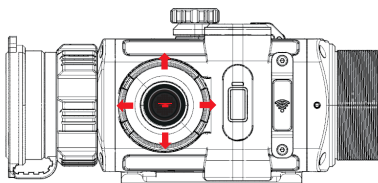

NOTE

All images used in this instruction manual are for illustrative purpose only. Actual product may vary due to product enhancement.

**ATTENTION!**

The main operations are performed through the "OneTouch Button" (5 position button) .

**ATTENTION!**

Turn off the device after usage, otherwise you can permanently damage the batteries!

The following settings will be restored to original values before changes made by user:

WiFi Status
Palette
Screen Brightness
Image Mode
Language
Calibration Mode

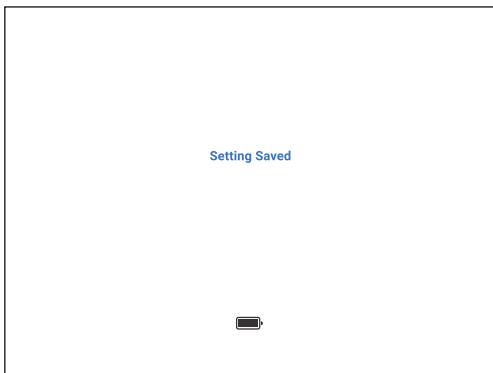

Alignment

Artemis is adjusted with accuracy from 0.1 mrad to 0.3 mrad before shipping out. The final accuracy depends on user's rifle scope, parallax and shooting distance. So Artemis offers super accuracy by alignment.

Operating Instructions for accuracy correction:

- 1) Aiming your daytime scope to the middle of target and shoot which is to test and control good daytime scope accuracy.
- 2) Clip Artemis onto the daytime scope by adapter. Aim to the thermal target and shoot again.
- 3) Measure horizontal distance x and vertical distance y between shooting position and target from step 2.
- 4) Short press **Up/Down** button to enter Alignment.
- 5) Short/long press **Up/Down** button to adjust the value of y , short/long press Left/Right to adjust the value of x .
 - Short press **Left** button, $x = -2.4\text{cm}$ on 100m
 - Long press **Left** button $x = -24\text{cm}$ on 100m
 - Short press **Right** button $x = 2.4\text{cm}$ on 100m
 - Long press **Right** button $x = 24\text{cm}$ on 100m
 - Short press **Up** button $y = 2.4\text{cm}$ on 100m
 - Long press **Up** button $y = 24\text{cm}$ on 100m
 - Short press **Down** button $y = -2.4\text{cm}$ on 100m
 - Long press **Down** button $y = -24\text{cm}$ on 100m
- 6) Short press **Middle** button to save and back.

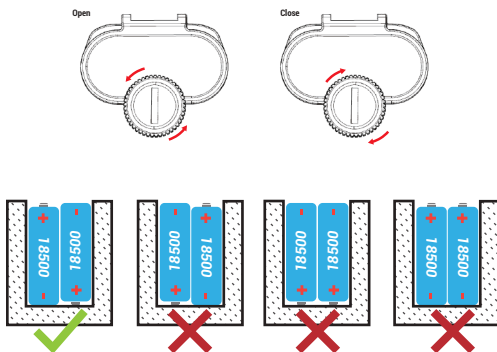

Auto NUC

Short press **Right/Left** button to move the cursor to Auto NUC.
Short press **Up/Down** button to switch ON/OFF.

Note: Short press **Left** button in real-time image to do Non-uniformity calibration.

Battery Installation

1. When the icon  is appeared on the display, please replace the new battery to supply;
2. It is necessary to power off before replacing the batteries, turn the battery compartment knob counterclockwise until stop.
3. Please install two 18500 batteries according to the positive and negative signs. Otherwise, the Artemis will not start.
4. Close the battery compartment knob.

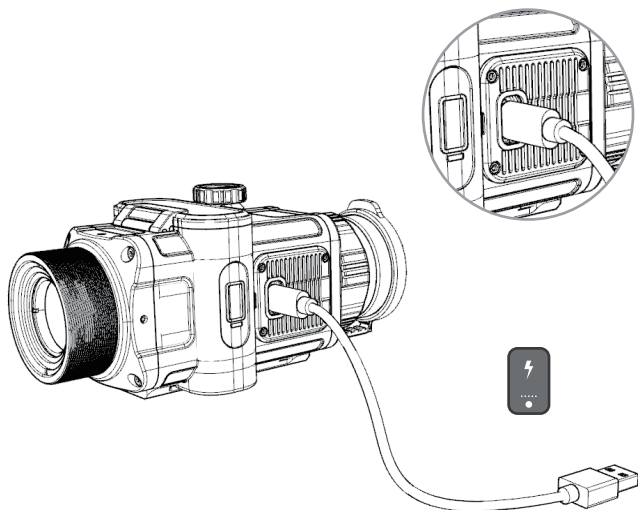

Battery charge level is displayed on the status bar.

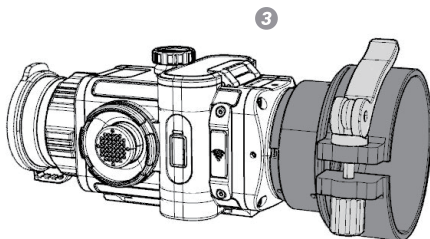

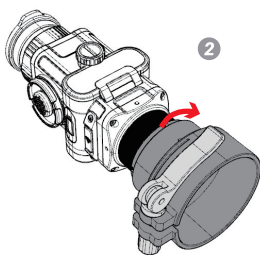

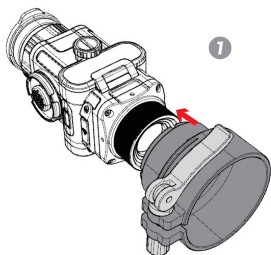

1. Power supply / Firmware update

The charging port is for 5V Type-C USB, serves for external power supply, data transmission and firmware update.

- Before storing it, clean obligatory the device (if on its surface there are moisture, dust or traces of dirt)!
- Make sure that there are no traces of moisture, and the battery compartment is empty!
- It is also possible for a short periods of time device to be stored in a suitable soft pack, bag or cartridge box.
- The premises in which the device is kept for long term have to be dry, enclosed, unheated and ventilated.
- During the storage should not be allowed exposure to aggressive environments, temperatures below -50°C and above $+60^{\circ}\text{C}$, relative humidity greater than 80%, and prolonged periods of direct sunlight.
- Before each transportation, the product should be neatly packed in its original packaging (transport bag) and all other items and accessories should be carefully and steadily placed in the bag. After that the bag should be steadily placed in the transport suitcase.
- You can ship the product with all types of transport at different distances and at altitude up to 12000 m.
