

MonsterDish™

5 GHz 37 dBi Antenna

Model: MD-5G37

QUICK START GUIDE

Introduction

Thank you for purchasing the Ubiquiti Networks® MonsterDish™ Antenna. This Quick Start Guide is designed to guide you through installation and also includes warranty terms.

For detailed information on package contents, please refer to the product packaging.

Installation Requirements

- 13 mm, 17 mm, and 19 mm wrenches

Note: Tighten all fasteners as follows:

- Tighten M8 fasteners to 25 N·m.
- Tighten M10 fasteners to 55 N·m.

- Phillips screwdriver

- Compatible radio* (sold separately):

- 5 GHz Rocket® radio
- 5 GHz airFiber® radio
(requires *Universal Bracket*, included with radio)

- Clear line of sight between radios

- Vertical mounting orientation

- Mounting point:

- At least 1 m below the highest point on the structure
- For tower installations, at least 3 m below the top of the tower

- (Recommended) 2 Outdoor Gigabit PoE surge protectors

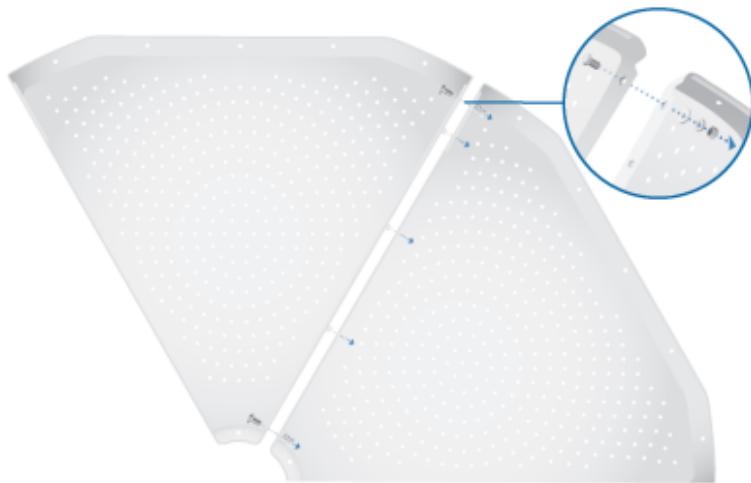

Note: For guidelines about grounding and lightning protection, follow your local electrical regulatory codes.

- Outdoor, shielded Category 6 (or above) cabling and shielded RJ45 connectors are required for all wired Ethernet connections.

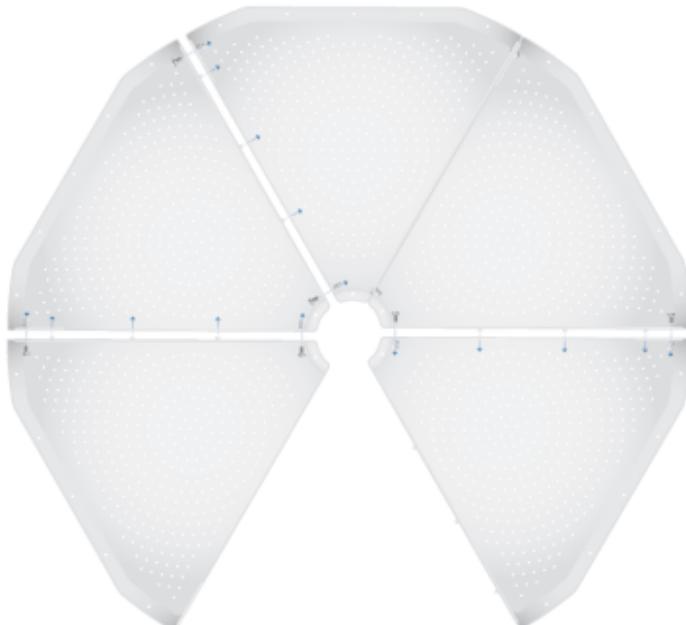

* Check your local/regional regulations for the allowable antenna gain allowed for your application.

Hardware Installation

1. Assemble two Reflector Panels using two loosely tightened M8 bolts and fasteners (flat washers, lock washers, and nuts). Attach the inner bolt first, then the outer bolt.

2. Attach three more Reflector Panels in the same manner, leaving all nuts loosely tightened.

3. Attach the Radio Feed to the reflector assembly, ensuring that the small locating pin is positioned in the open space at bottom.

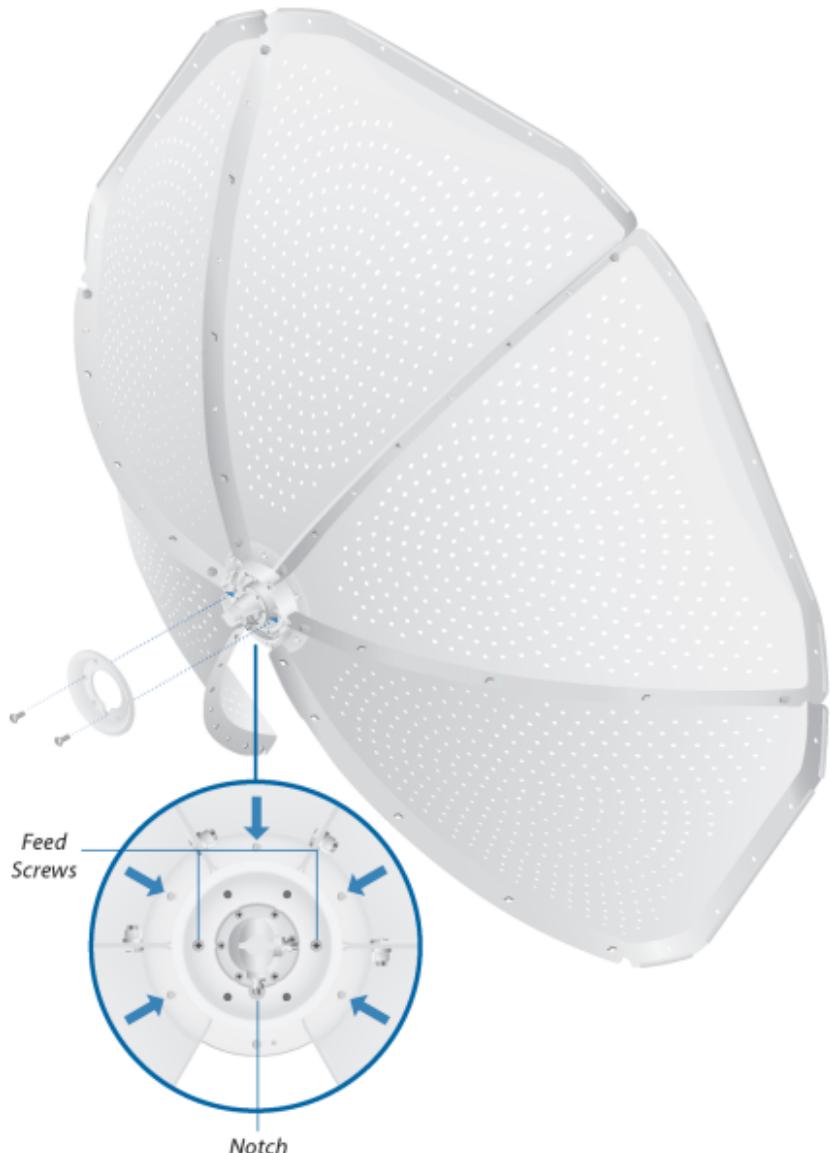

Note: The default polarity of the Radio Feed is V/H.

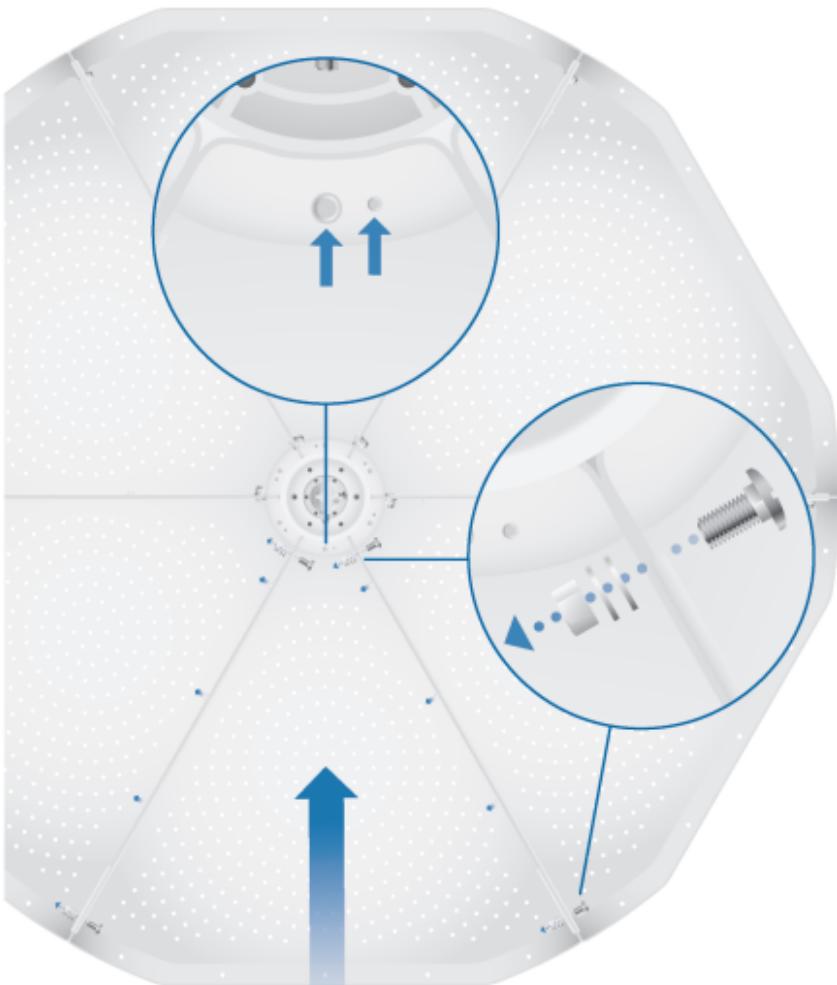

To change to dual slant 45 polarity, perform the instructions in the section, “*Dual Slant 45 Polarity (Optional)*”, before proceeding with this step.

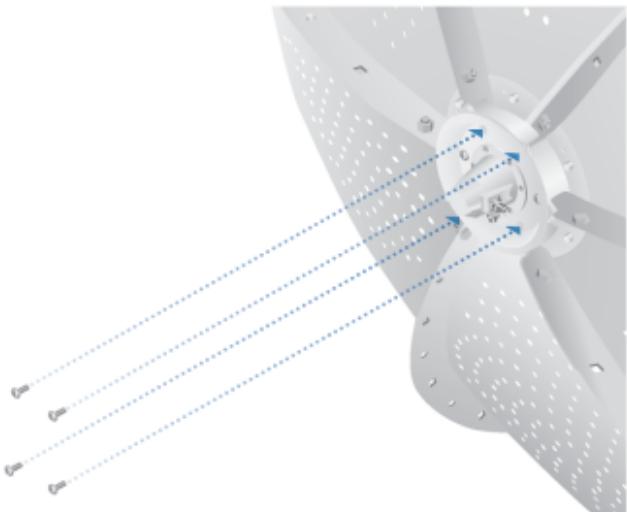

4. Attach the Feed Support Plate to the Radio Feed with the notch pointing to the open space, using two Feed Screws in the positions shown. Tighten the screws only until the five locating pins (indicated by arrows below) on the Radio Feed begin to engage the holes in the Reflector Panels.

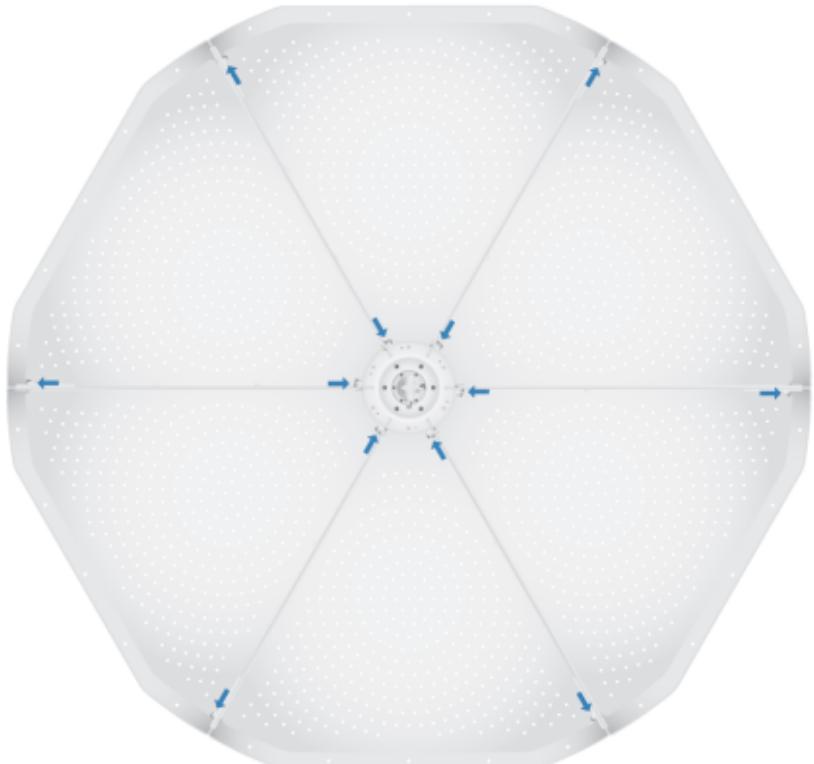

5. Guide the last Reflector Panel in place under the Feed Support Plate and attach the panel using four loosely tightened M8 bolts and fasteners (flat washers, lock washers, and nuts), two near the Feed Support Plate and two near the panel's outer edge. Ensure that all locating pins are engaged between adjacent panels and with the Feed Support Plate.

6. Install the remaining Feed Screws in the Feed Support Plate and tighten all six Feed Screws completely.

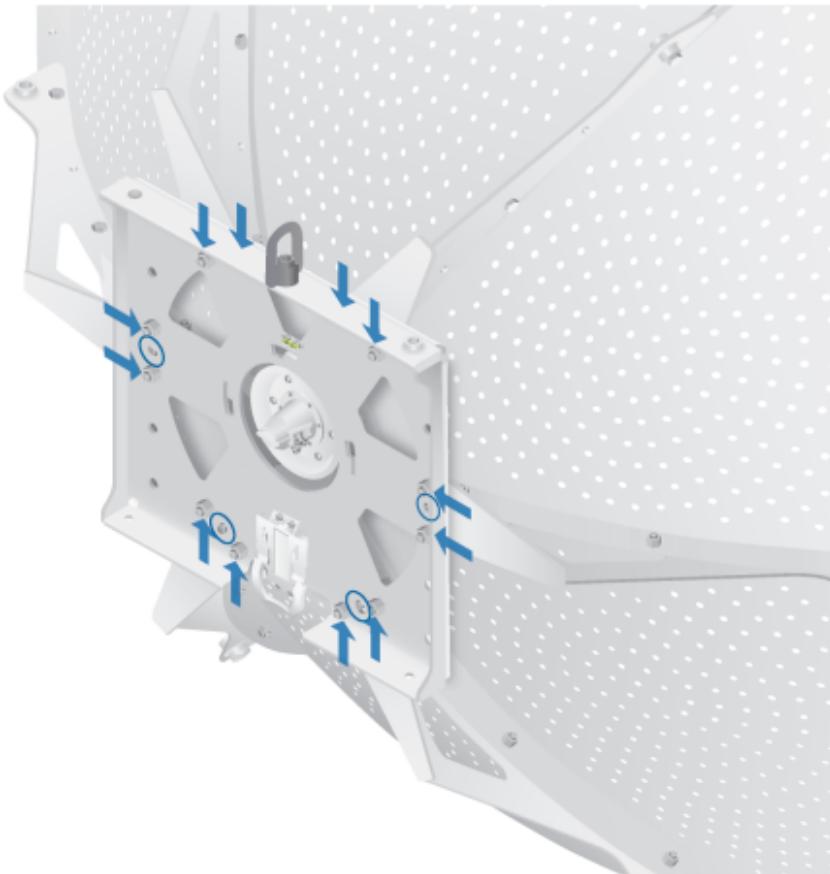

7. Securely tighten the six innermost fasteners on the reflector panels, and then the six outermost fasteners.

8. Attach the six Support Arms to the ribs of the Reflector Panels using 18 M8 bolts and fasteners (flat washers, lock washers, and nuts), leaving them loosely tightened.

9. Place the Frame Plate on the Support Arms, ensuring that the six locating pins (circled below; two pins are hidden by the Frame Plate) fully engage the bracket. Then install 12 Frame Plate M10 bolts and fasteners (flat washers, lock washers, and nuts), one on each side of each locating pin.

10. Fully tighten the 18 fasteners that were attached to the Support Arms in step 8.

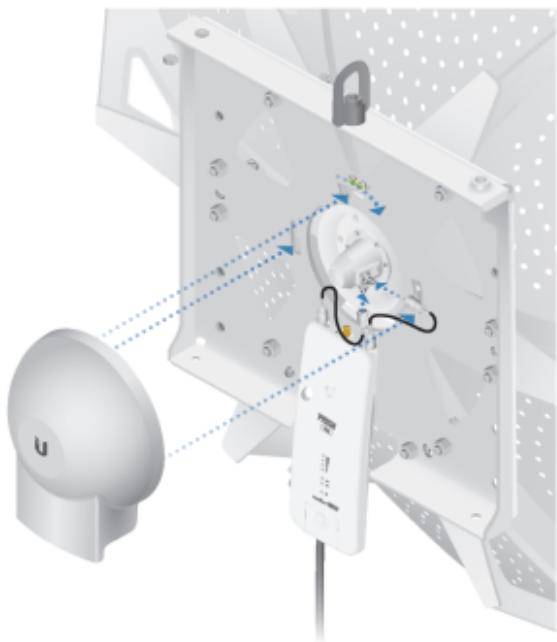

11. Attach the RF Cables to the radio (the Rocket Prism 5AC Gen2 is shown below as an example).

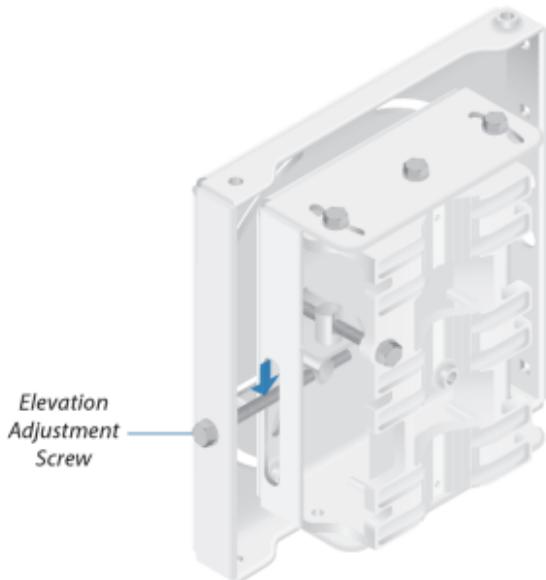

12. Mount the radio onto the Frame Plate.

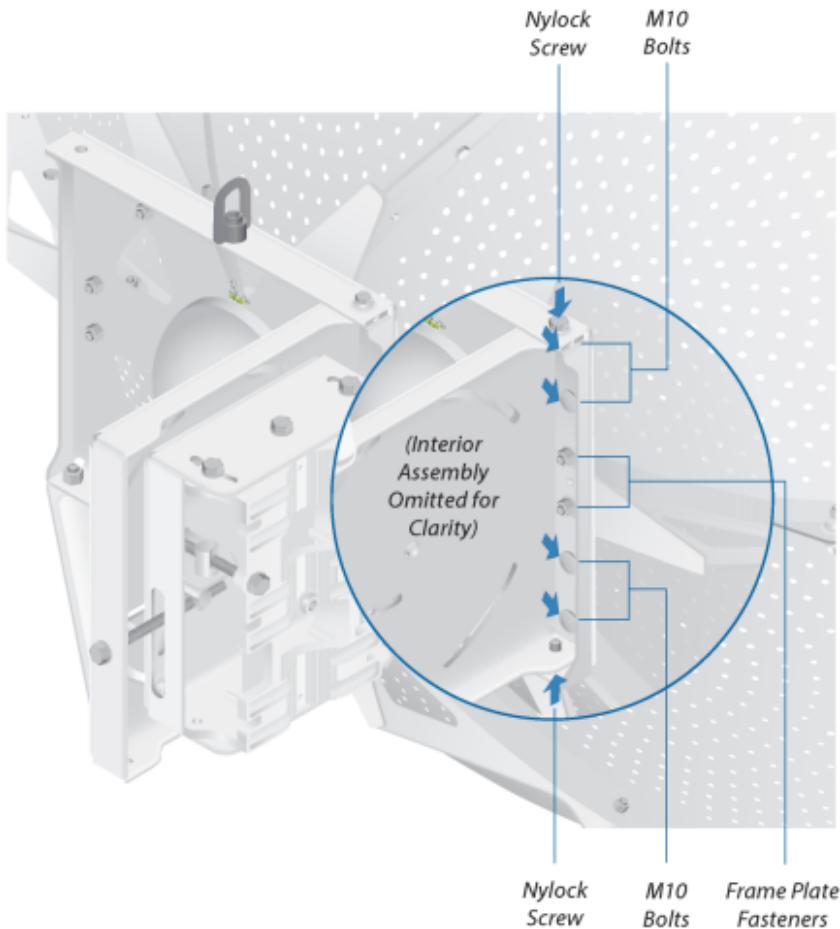

13. Connect the RF Cables to the SMA connectors, and attach the Shroud over the radio.

14. Apply Grease (included) to the threads of the elevation adjustment screw on the Precision Aiming Bracket.

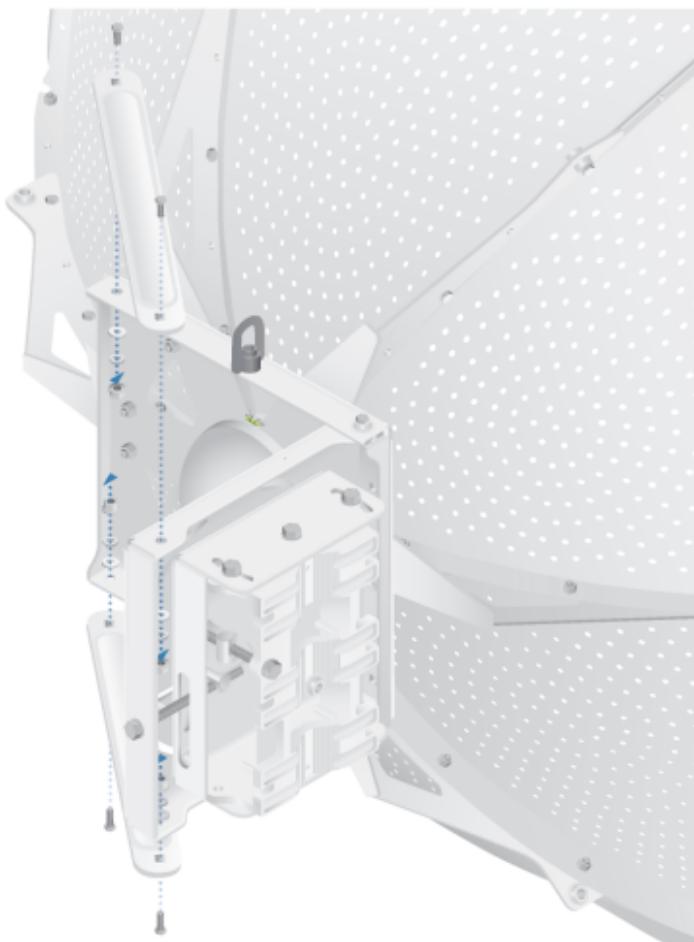

15. Place the Precision Aiming Bracket on the Frame Plate on the opposite side of the dish from where the Wind Brace will be installed. Guide the holes over the fasteners on the Frame Plate. Secure the Precision Aiming Bracket using four M10 bolts and fasteners (flat washers, lock washers, and nuts), tightening them fully.

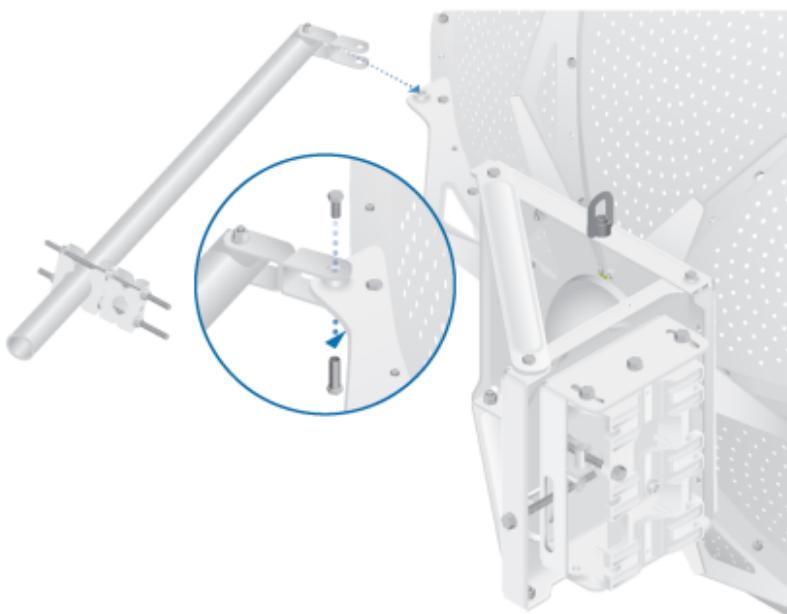

Note: Two Nylock Screws can be installed to provide additional support.

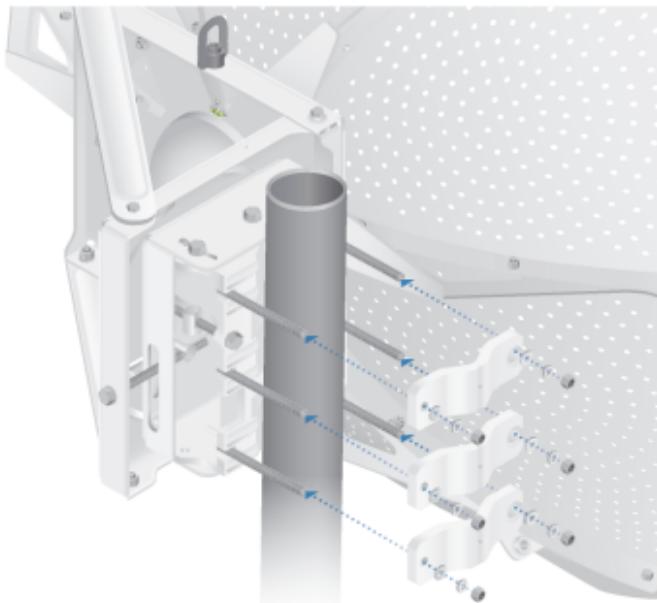

16. Attach the two Support Braces to the Frame Plate and Precision Bracket using two M10 bolts and fasteners (flat washers, lock washers, and nuts) per brace.

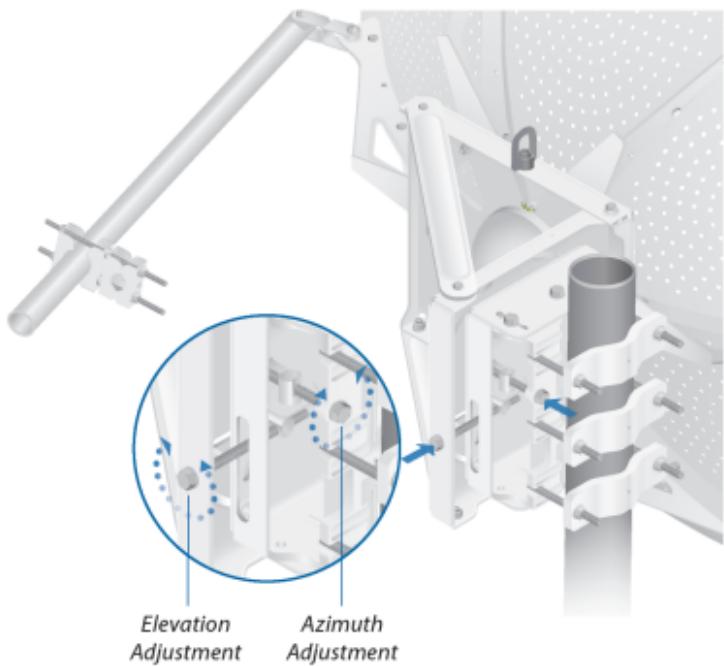

17. Attach the Wind Brace to the Support Arm on the opposite side of the dish from the Precision Aiming Bracket.

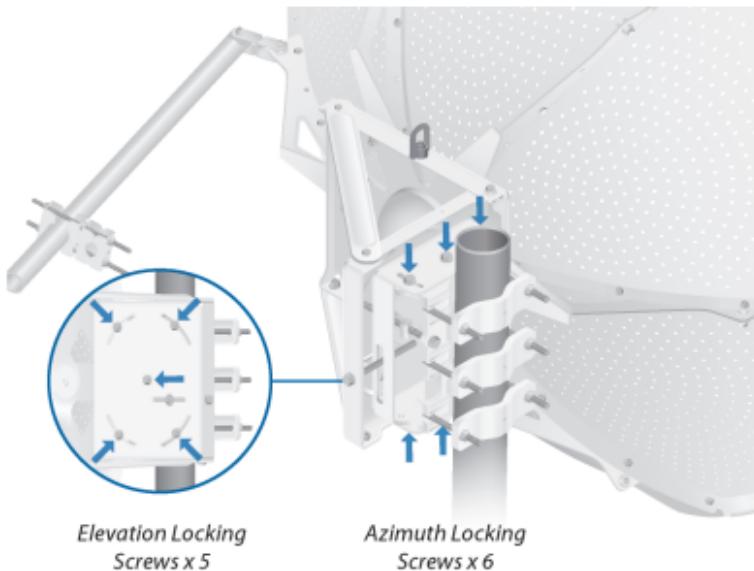

18. Lift the dish assembly by the hoist ring, and secure the Precision Aiming Bracket to a pole using the three Mount Clamps and Mount Clamp M10 bolts and fasteners (flat washers, lock washers, and nuts).

19. Fine-tune the aiming by turning the elevation and azimuth adjustment screws.

20. Lock the elevation and azimuth by tightening 11 locking screws (one screw is not shown below due to the pole).

21. Attach the Wind Brace to a support pole to complete the installation.

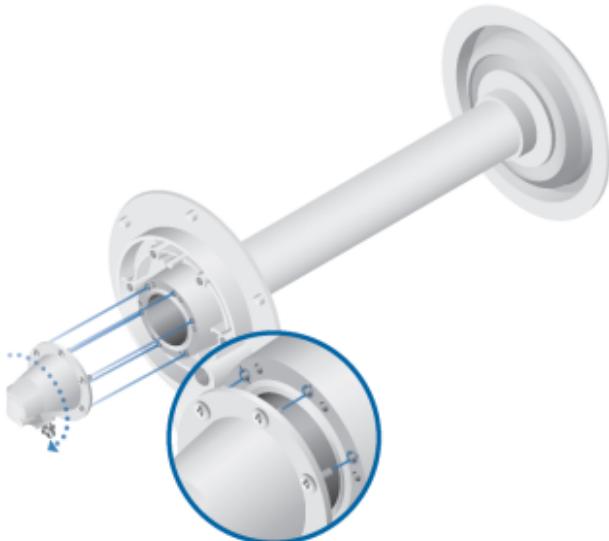

Dual Slant 45 Polarity (Optional)

By default, the Radio Feed uses V/H polarity. To change it to use dual slant 45 polarity, perform the steps below before attaching the feed to the dish assembly:

1. With the small locating pin in the 6:00 position, remove six screws from the OMT and detach it from the Radio Feed.

2. Rotate the OMT clockwise 45° and reattach it to the Radio Feed using the holes with hash marks.

Safety Notices

1. Read, follow, and keep these instructions.
2. Heed all warnings.
3. Only use attachments/accessories specified by the manufacturer.

 **WARNING:** Do not use this product in a location that can be submerged by water.

 **WARNING:** Avoid using this product during an electrical storm. There may be a remote risk of electric shock from lightning.

Electrical Safety Information

1. Compliance is required with respect to voltage, frequency, and current requirements indicated on the manufacturer's label. Connection to a different power source than those specified may result in improper operation, damage to the equipment or pose a fire hazard if the limitations are not followed.
2. There are no operator serviceable parts inside this equipment. Service should be provided only by a qualified service technician.

Limited Warranty

www.ui.com/support/warranty

The limited warranty requires the use of arbitration to resolve disputes on an individual basis, and, where applicable, specify arbitration instead of jury trials or class actions.

RF Exposure Warning

The antenna and transmitter must be installed to provide a separation distance from all persons and must not be located or operating in conjunction with any other antenna or transmitter. For the specific separation distance, refer to the Quick Start Guide for your device (transmitter).

L'antenne et l'émetteur doit être installé pour fournir une distance de séparation de toute les personnes et ne doit pas être situé ou opérant en conjonction avec une autre antenne ou un autre émetteur. Pour la distance spécifique de séparation, se référer au Guide de démarrage rapide pour votre appareil (l'émetteur).
