Upgrade your hunting game with the PARD MT3 Quick-Release Mount – where convenience meets reliability!

Dimensions (mm)

Note: Use M6 screws to fix the mount on the riflescopes.
Installation

Step 1: Attachment to Riflescope
Using M6 screws, securely attach the MT3 mount to your riflescope. Be sure to fasten them appropriately.

Step 2: Assembly on the Picatinny Rail
Place your riflescope in a comfortable position on the Picatinny rail.

Step 3: Initial Setup (First Use)
For your initial use, it's essential to tighten the fastening screws as shown in the following picture. Adjust them according to the size of your Picatinny rail.
Step 4: Secure Fastening Screws

Once the fastening screws are appropriately tightened, secure them in place using the set screws. For future use, you won't need to tighten both the fastening screws and set screws.

Step 5: Lever Closure

Achieve a firm assembly by closing the lever. Simply push the button as indicated in the provided picture to ensure a snug fit.

Step 6: Zeroing Preparation

Your riflescope is now ready for zeroing. Proceed with your zeroing process as needed.

Step 7: Uninstallation

When it's time to uninstall the mount, push the button again to release and remove it.

Please follow these steps carefully to ensure the proper installation and use of your PARD MT3 Quick-Release Mount.
