

G1394-0350WNA

The G1394-0350WNA is a 12VDC 27.5A 350W hot-swap power supply designed for the CRS804 DDQ switch.

It serves as a direct replacement power module, allowing you to restore full power redundancy or replace a failed unit without shutting down the device. The module can be installed or replaced while the switch is running, ensuring uninterrupted operation in critical environments.

This power supply is ideal for data centers, enterprise racks, labs, and any deployment where standard AC mains power is used.

• Specifications

Product code	G1394-0350WNA
AC input	100 - 240V ~50-60Hz 8A MAX
DC input	240V, 27,5A MAX +5VSB, 4A
Output power	350W
Dimensions	40 x 50.5 x 220 mm
