# OUR ROBUST BINOCULAR – WITH SINGLE OCULAR FOCUSING

## 7.5x44 RAPID

Stalking in rough terrain or in the mountains can be very challenging to you and your equipment. For exactly these types of tough hunting situations, we have developed the MINOX 7.5x44 RAPID with single ocular focus adjustment. It exhibits its strength when objects at a distance of about 20 m or more have to be quickly and sharply recognizable. This saves you the hassle of having to focus and avoids unnecessary movements, for which you don't have time for when identifying game at the crucial moment. At the same time, you can operate the RAPID comfortably with one hand. It is also equipped with rubber wiper lips instead of sealing rings to prevent moisture and dirt from penetrating. Discover your new stalking glass - with 30-year warranty (after registering for the MINOX Comfort Service at [minox.com](http://minox.com))!

- 1 | Single ocular focussing for an especially fast identification of objects
- 2 | Innovative rubber wiper lips more effectively prevent the penetration of moisture and dirt
- 3 | Extremely robust metal twist-and-pull rotating eyecups
- 4 | 7.5x magnification for a steady image and wide field of view
- 5 | Comfort Bridge for secure one-handed use
- 6 | Light polycarbonate housing
- 7 | Waterproof according to IPX 7 and nitrogen gas purged to prevent internal fogging
